

Audio / Video

ASPEN technologies provides Audio / Video solutions for residential and small & medium businesses. The applications that we support are; background music, video solutions, sound reinforcement, desktop and room based video conferencing. We work with a long list of manufacturers that are the leaders in their respective industry; **Avistar, LG, Mitsubishi, Panasonic, Samsung, Sony, SpeakerCraft, and Monitor Audio** to name a few.

Background Music – Various Manufacturers

- **ASPEN technologies** provides the design, product and installation of background music used in various settings; elevators, offices, warehouses, break rooms, lobbies, conference centers and rooms as well as your residence.

Video Solutions – Various Manufacturers

- **ASPEN technologies** provides the design, product and installation of video solutions used in various settings; classrooms, conference centers, private executive offices, lobbies and private residence multi-media rooms.

Sound Reinforcement – Various Manufacturers

- **ASPEN technologies** provides the design, product and installation of sound reinforcement systems used in various settings, churches, auditoriums, and hotel conference centers.

Video Conferencing

Desktop: **ASPEN technologies** provides the design, product and installation of;

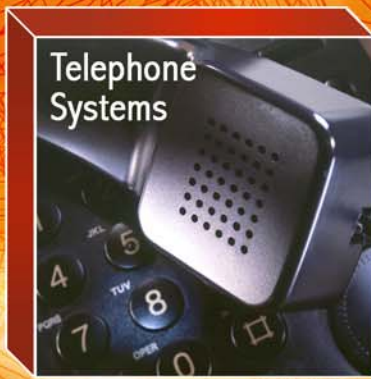

- Avistar is recognized as a pre-eminent leader and innovator in solving the significant challenges of scale, quality and performance required to deliver video communications and collaboration services that are a measurable asset in organizational performance. We provide the technology that supplies the missing critical element in unified communications. Avistar brings people in organizations face-to-face through enhanced communications, for true collaboration anytime, anyplace. Its latest product, C3, draws on over a decade of market experience to deliver a single-click desktop or room-based videoconferencing and collaboration experience, that moves business communications into a new era.
- Available as a stand-alone solution, or integrated with existing unified communications software from other vendors, Avistar's C3 users gain instant messaging-style ability to initiate video communications and collaborate across and outside the enterprise. Patented bandwidth management enables thousands of users to access desktop videoconferencing, Voice over IP (VoIP), collaboration services, and streaming media without requiring substantial new network investment or impairing network performance.

Room System: **ASPEN technologies** provides the design, product and installation of;

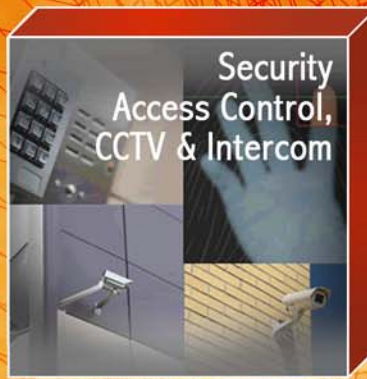

- Sony's next generation IPELA High Definition Visual Communications System, the PCSXG80. This "industry first" system offers up to 1080i HD resolution at an affordable price point, enabling dynamic real-time collaboration with up to six participants.
- As display and screen sizes become larger, so do the image sizes, which is why HD videoconferencing systems are so critical. HD images provide approximately four times more detail than standard definition images, delivering fine detail and true depth and dimension to the visual communication experience.
